Report of the Board of Directors

NBG INTERNATIONAL FUNDS SICAV / INCOME PLUS SUB-FUND

2013 was a successful year in the multi-year repair process post global financial crisis. Developed world equity markets led the way with S&P returning almost 30%, DAX more than 25% and NIKKEI close to 57%. Credit markets, particularly at the higher beta end of the credit spectrum, had also high returns and in general outperformed government bonds.

Major central Banks kept their ultra-supportive stance and continued adding ample liquidity to the global banking system. This policy started yielding positive results and the Fed already announced it will end QE whilst the ECB's current policy mix is likely to be enough to help the Euro zone not only avoid a deflationary bubble but also return to positive growth.

The yield of the German 10-year government bond started the year at 1.32% and briefly below 1.20% before starting rising again, as markets felt that the era of super easy monetary policy may come to an end. It finished the year at 1.93%. The 2-year government bond finished the year at 0.21% having started at negative 0.03%. On the corporate side, risky assets finished the year in very positive mode, providing high returns. The on-the-run iTraxx Crossover index tightened by more than 200bps while the non-financial cash index was a little less than 150bps tighter.

Within this framework, NBG International Funds Sicav / NBG International Income Plus 2013 annual return was 3.04% outperforming its benchmark (Citi EuroBig Corp 1-3 years) which returned 1.90%.

NBG INTERNATIONAL FUNDS SICAV / GLOBAL EQUITY

The year 2013 proved to be a very strong year for equities. The returns in developed stock markets were impressive and some of them hit new record highs. Although the year started and continued with many concerns such as the US fiscal cliff, the political uncertainty and disappointing data from European peripherals (Spain and Italy), the Cyprus bailout and Fed's tapering its asset purchasing programme, risk appetite remained very strong as growing optimism for global economy plus accommodative monetary policy from top central banks dominated market performance.

In particular, Japanese equities realized the strongest yearly return since 1972 attributed to BOJ's balance sheet expansion and to 18% Yen's depreciation. US equities also had impressive performance and even the Fed's decision of the reduction of its asset purchases in December was welcomed as a positive signal about the strength of the US economy. Moreover European equities over performed since concerns about sovereign debt crisis during the year narrowed and Eurozone appeared moving out of recession in H2.

The Sub-Fund had a very positive year. The top sector performers were different in each continent. The telecom services sector outperformance in Japan and Europe and the financial sector outperformance in the US are among the ones that contributed the most to the Sub-Fund's performance.

As last year's macro risks have faded, in the year 2014 evolution of corporate earnings is expected to guide the market's return. The Sub-Fund will adjust accordingly its strategy during the course of the year 2014.

The annual return for the year ended 2013 was 20.47% for the Sub-Fund NBG Global Equity-Class B and 20.44% for the Sub-Fund NBG Global Equity-Class A.

Note: The figures stated in this report are historical and not necessarily indicative of future performance.

NBG INTERNATIONAL FUNDS SICAV / EUROPEAN ALLSTARS

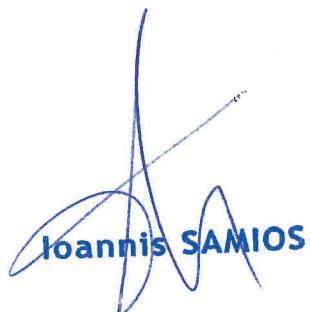

The year 2013 was characterized by positive returns, as the accommodative policy from major central banks and positive outlook for global economy outweighed concerns such as the US fiscal cliff, the political uncertainty and disappointing data from European peripherals (Spain and Italy), the Cyprus bailout and Fed's tapering. The European market had a return of more than 15%, with some volatility in the first months and major upside in the second half of the year. German market over performance continued for one more year, in expense of the periphery markets.

NBG International Funds Sicav / European AllStars had a very positive year of performance. The Sub-Fund was overweight in the financial sector and in specific German exporters in the first quarter of the year. The Sub-Fund followed the performance of the index in the second half of the year, while it benefited from specific trading ideas.

For the year 2014 the Sub-Fund will remain heavily invested, with a preference in sectors such as banks, insurance, autos, technology and possibly utilities that have underperformed so far. The periphery stocks will gradually gain more exposure in expense of the European core countries' stocks.

The selection criteria will continue to be bottom up. Large cap companies with strong fundamentals, consistent management, healthy balance sheets, growth potential, will be part of the portfolio.

The annual return for the year ended 2013 was 19.56% for the Sub-Fund NBG European AllStars–Class A and 19.59% for the Sub-Fund NBG European AllStars–Class B.

2.2 Valuation of investment in securities

2.2.1 Securities listed on a recognised stock exchange or dealt in on any other regulated market (hereinafter referred to as a “regulated market”) that operates regularly, is recognised and is open to the public, are valued at their last available closing prices, or, in the event that there should be several such markets, on the basis of their last available closing prices on the main market for the relevant security.

The closing prices used were those of December 31, 2013.

2.2.2 In the event that the last available closing price does not, in the opinion of the Board of Directors, truly reflect the fair market value of the relevant securities, the value of such securities is defined by the Board of Directors based on the reasonably foreseeable sales proceeds determined prudently and in good faith.

2.2.3 Securities not listed or traded on a stock exchange or not dealt in on another regulated market are valued on the basis of the probable sales proceeds determined prudently and in good faith by the Board of Directors.

2.2.4 Investments in UCITS/UCIS are valued on the basis of the last available net asset value of the units or shares of such UCITS/UCIS.

2.3 Net realised gains or losses resulting from investments

The realised gains or losses resulting from the sales of investments are calculated on an average cost basis.

2.4 Foreign exchange translation

The accounts of each Sub-Fund are maintained in Euro (EUR) and the financial statements are expressed in that currency.

The acquisition cost of securities expressed in a currency other than the Euro is translated in Euro at the exchange rates prevailing on the date of purchase.

Income and expenses expressed in other currencies than the Euro are converted at exchange rates ruling at the transaction date.

Assets and liabilities expressed in other currencies than the Euro are converted at exchange rates ruling at the end of the year. The realised or unrealised gains and losses on foreign exchange are recognised in the statement of operations and changes in net assets in determining the increase or decrease in net assets.

The following exchange rates have been used as at December 31, 2013:

1 EUR = 1.22455	CHF	1 EUR = 7.45995	DKK
1 EUR = 0.8359	GBP	1 EUR = 10.7129	HKD
1 EUR = 145.1006	JPY	1 EUR = 8.3965	NOK
1 EUR = 8.8773	SEK	1 EUR = 1.75105	SGD
1 EUR = 1.38145	USD
